

Feel sick? Get Tested

Part of looking after yourself and the people you love is knowing when to rest up and take it easy, and knowing when to get help.

If you feel sick, get tested. Getting tested is the #1 way to keep you, your family, and the community safe from COVID-19.

Don't dismiss it as just another flu, or detox symptoms. Don't assume it will just go away.

Get tested if you have: a cough, sore/scratchy throat, shortness of breath and/or a fever.

Get Tested and Be Sure.
